

***Slovenian Feed-in Support System for
Electricity from RES and High-efficiency
CHP***

- PERIODIC REPORT -

Period: from 1.1.2018 to 31.3.2018

Date of report: 6.6.2018

1. Power plants in the system

On **31.3.2018** the feed-in system included **3.877** power plants with a combined installed capacity of **414 MWe**.

In the period from **January to March 2018** a total of **29 new contracts were prepared**. This includes power plants where there was a change in ownership or support type (guaranteed purchase (=classic feed-in) vs. operational support (=feed-in premium)).

2. Support payments

The total electricity production within the support system reduced by 8 % compared to the same period in 2017 (Q1 2018 vs. Q1 2017). The difference in support payments was negative (-20 %) as well.
