

***Slovenian Feed-in Support System for Electricity  
from RES and High-efficiency CHP***

***- PERIODIC REPORT -***

**Period: from 1. 1. 2026 to 31. 3. 2026**

**Date of report: 13. 05. 2026**

## 1. Power plants in the system

As of March 31, 2026, 2,877 units with a total installed net capacity of 476.8 MW were included in the support scheme, compared to 3,231 units with a total capacity of 512.6 MW at the end of March 2025. Of all units, 2,569 operated under the old support scheme based on previously determined reference costs, while 308 units were included in the scheme under the EZ-1 Energy Act, either through public calls for applications or by transitioning from the old support scheme. The largest share among the generation facilities included in the support scheme consists of solar power plants and CHP plants using fossil fuels. A more detailed overview of the structure of generation facilities by number of units and installed capacity is presented in the following table.

## 2. Support payments

In the first quarter of 2026, approximately the same amount of support payments was disbursed as in the same period of 2025, while electricity generation increased by around 156%. Total electricity generation amounted to 424 GWh, which is significantly higher than in the same period of 2025, when it amounted to 165.5 GWh. The sharp increase was primarily driven by electricity generation from CHP plants using fossil fuels, which reached 350.78 GWh in the first quarter of 2026 due to the inclusion of a new high-capacity CHP plant in the scheme.

The average support payment in the first quarter of 2026 amounted to EUR 43.7/MWh, representing an approximately 61% decrease compared to the same period of 2025, when it stood at EUR 111.5/MWh.

**Table 1: Comparison of electricity production (GWh), support payments (in mio EUR, VAT excl.) and average support (EUR/MWh) in first quarter of 2025 and 2026**

Period	2025 (JAN-MAR)	2025 (JAN-MAR)
Electricity production (GWh)	165	424
Support payments (in mio EUR, VAT excl.)	18.4	18.5
Average support (EUR/MWh)	111.5	43.7

The structure of support payments and electricity production by power plant type in first quarter of 2026 is presented in the table below.

**Table 2: Support payments and electricity production by power plant type in 2026 (JAN-MAR 2026)**

Power plant type	Support payments (mio EUR) (VAT excl.)	Electricity produced (GWh)	Support Share (%)	Electricity Share (%)
Biogas	2.30	15.61	12.38%	3.68%
Other	0.95	1.87	5.12%	0.44%
Wood biomass	2.48	14.35	13.38%	3.38%
Hydropower	0.17	9.83	0.94%	2,32%
Solar PV	7.15	30.12	38.55%	7.10%
Wind power	0.04	1.44	0.21%	0.34%
Fossil fuel CHP	5.45	350.78	29.41%	82.73%
<b>TOTAL</b>	<b>18.54</b>	<b>424</b>	<b>100%</b>	<b>100%</b>
