***Slovenian Feed-in Support System for
Electricity from RES and High-efficiency
CHP***

- PERIODIC REPORT -

Period: **from 1.1.2015 to 30.9.2015**

Date of report: **9.11.2015**

1. Power plants in the system

On **30.9.2015** the feed-in system included 3915 power plants with a combined installed capacity of **428 MWe** (this figure includes the TE-TOL CHP power plant with an installed capacity of 8.900 kWe).

In the period from **January to September 2015** a total of **210 power plants entered the system**. This includes both new entrants and power plants where there was a change in ownership or support type (guaranteed purchase (=classic feed-in) vs. operational support (=feed-in premium)).

Among the **210** there were **141 new entrants, with a combined installed capacity of 16.983 kWe**. The structure by type is as follows: 100 fossil-fuel high-efficiency CHP (14.158 kWe), 16 were solar PV plants (741 kWe).

2. Support payments

The trend of rising support payments continues in the first nine month of 2015. The total electricity production within the support system increased by +4% compared to the same period in 2014. The difference in support payments is was +9% as well.
