

Slovenian Feed-in Support System for Electricity from RES and High-efficiency CHP

- PERIODIC REPORT -

Period: from 1.1.2016 to 30.9.2016

Date of report: 3.11.2016

1. Power plants in the system

On **30.9.2016** the feed-in system included **3.893** power plants with a combined installed capacity of **415 MWe**.

In the period from January to September 2016 a total of 69 power plants entered the system. This includes power plants where there was a change in ownership or support type (guaranteed purchase (=classic feed-in) vs. operational support (=feed-in premium)).

2. Support payments

The trend of rising payments has stabilized in 2016. The total electricity production within the support system increased by +5% compared to the same period in 2015. The difference in support payments was +2%.
