

Slovenian Feed-in Support System for Electricity from RES and High-efficiency CHP

- PERIODIC REPORT -

Period: from 1.1.2017 to 30.9.2017

Date of report: 27.10.2017

1. Power plants in the system

On **30.9.2017** the feed-in system included **3.879** power plants with a combined installed capacity of **402 MWe**.

In the period from January to September 2017 a total of 49 power plants entered the system. This includes power plants where there was a change in ownership or support type (guaranteed purchase (=classic feed-in) vs. operational support (=feed-in premium)).

2. Support payments

The trend of rising payments has stabilized in 2016. The total electricity production within the support system decreased by +5% compared to the same period in 2016. The difference in support payments was +0,7%.
